

SÄKAPHEN Cleaning Paste 80.750

Product description:

The SAEKA Cleaning Paste 80.750 prevents dust and continuous water films on insulators and protects against flash overs. The SAEKA Cleaning Paste extends maintenance cycles and reduces downtime. The SAEKA Cleaning Paste is suitable for the cleaning and sealing of heavily soiled, smooth and scratch resistant surfaces in one pass. Simply apply with a cloth and polish. In areas with high humidity or air pollution, additional protection with SAEKA Silicone Grease 81.750 is recommended.

The product is physiologically harmless. No protection is needed.

Filling weight: 750 g

Characteristics:

Resistant against corrosive mediums, salts or gaseous contaminations in the air.

Easy application. Do not store below +10°C.

Fields of application:

SAEKA-Cleaning paste is primarily used for cleaning of high voltage insulators. Additionally the SAEKA-Cleaning paste can be used for cleaning and maintaining of various metals especially stainless steel and brass. Important all surfaces shall not be polished to avoid visual imperfection after cleaning.

Practical test results:

KV		Tgδ (%) permittivity		C (pF)		GΩ surface re- sistance	
63,5	63,5	3,52	0,042	5,29	5,29	18,8	1557
100	100	3,60	0,043	5,29	5,29	18,3	1540
130	130	3,75	0,043	5,29	5,29	17,5	1540
200	200	4,25	0,043	5,29	5,29	15,5	1540
