

The perfect solution for all food areas

Series
161/162... LM
161/162... LED LM

- designed according to IFS Standard, tested by LGA and VDE
- special diffuser, highly chemical resistant and shatterproof
- stable to greases and aggressive cleaning agents, disinfectants and solvents
- also available as LED Version

SCHUCH – with passion for excellent lighting.

Problem zone „food areas“

In case of illumination projects in the commerce and industry sectors there are always critical areas which need particular solutions. These include the food industry and the food processing operations with their high cleanness and hygiene requirements.

Especially sensitive are risk areas in the food production and food processing where unsealed food is handled such as at separating belts, production and processing zones.

Also sub-suppliers to the food industry which are subject to the regulations of „International Food Standard“ (IFS) or to other comparable strict requirements such as the manufacturers of food packing material need a particular solution.

SOLUTION

Series 161/162... LM and 161/162... LED LM – based on the dustproof/waterproof, millionfold proven, high-quality, robust and extremely loadable series 161/162, however, modified especially for application in the food areas.

Their advantages are impressive:

1. Designed according to IFS Standard, tested by LGA and VDE.

The light fittings comply with the requirements of International Food Standard (IFS) and of British Retail Consortium (BRC) as well as with the hygiene requirements of VDMA

IFS

LGA

VDE

2. Stable to greases and aggressive cleaning agents, disinfectants and solvents.

Special diffuser, highly chemical resistant and shatterproof for food areas.

We would recommend to have the agents used tested by us with regard to its stability.

3. Highest acceptable quality level.

Special diffuser with very high impact resistance (>20 Nm) at high continuous operating temperature, resistant to yellowing, food-safe, with stainless steel clips and physiologically perfect gasket.
