

Floodlight for Lamps up to 500W for Zones 2 and 22 Series nD 2770/2780

Applications:

Hazardous areas of Zones 2 and 22 classification.

Design:

Housing and glass retaining frame are made from weather resistant diecast aluminium, powder coated in black (RAL 9005 mat). The glass frame is locked by 2 socket head cap screws (M6) and it is hinged to body after opening. The electrical components are located inside the floodlight.

Reflector: Depolished purest aluminium.

Front cover: Thermal safety glass glued into the frame.

Connection terminal: Standard: 3 poles for max. 2,5mm² conductor Ø.

Cable entry: 1 gland 1 x M20 x 1.5.

For some versions heat resistant connection cable is required.

Operating position: Lamp orientation horizontal.

Installation:

Aluminium stirrup that can be tilted infinitely around the longitudinal axis of the floodlight. Max. range of tilting please see diagrams.

Schuch Quality - your advantage:

- sturdy, high-grade floodlight for reliable and safe long-term use
- compact design, with all electrical components ready for connection
- high-efficient light technical optimized mirror system with high light efficiency factor
- excellent light distribution, glare limitation and minimized stray
- easy to install and to maintain
 - suitable for gas- and dust-hazardous areas (Zone 2 and 22)
 - wide range of Permissible ambient temperatures -20°C up to +50°C
 - for lamps from 80 W up to 500 W
